

PAEDIATRIC WRISTBAND/ID TAGS

LB2-PED-BABY-LE

WITH 16 LABELS – A4 FORMAT

The LB2-PED-BABY-LE provides a global solution for paediatric/baby identification by combining two self-laminating paediatric wristbands and one self-laminating ID tag.

IDEAL FOR ORGANISATIONS NEEDING

- Wide range of wristband sizes for paediatric and baby patients
- Streamlined patient intake process with a combined wristband/label form for simultaneous printing
- Additional banding security that also indicates tampering
- Patient data protected by self-sealing laminated wristband

FEATURES

- A4 sheet size compatible with standard laser and inkjet printers worldwide
- Wristbands comfortably fit baby and paediatric patients
- Two self-laminating ID tags can be used with the LB2-BABY-P ComfyCuff® to provide maximum comfort when banding a paediatric patient's wrist or ankle
- Labels included on form streamline the patient ID print process and free up printer drawers for other documents
- Patented self-laminating seal is water and alcohol resistant, preserving patient data for longer wristband usability
- Adhesive-free zone around form edges and holes prevent printer jamming and reduce costly maintenance
- Clear laminate and ultra-white image area optimises scanner performance
- Wristband extender included to help fit a wide range of patient sizes and conditions (bariatric, oedema, etc.)
- Hole-punched to fit securely in healthcare charts
- Integrated security seal indicates wristband tampering and ensures a more permanent fit
